EXPERIENCE

ARS Portable Agnostic Solutions Pvt. Ltd.

Jul. 2025 – Feb. 2026

L1 Quality Analyst (AI/ML Engineer & QA)

Remote

- Designed and deployed an internal **RAG system** using **Azure Cognitive Search** and **Azure OpenAI**, enabling end users to query product documentation through natural language Q&A
- Built retrieval pipelines with **semantic search** using vector embeddings and fine-tuned query prompts, improving retrieval accuracy and significantly reducing manual document lookup time
- Contributed to small-scale **feature development** and end-to-end **bug detection and fixing** across AI-powered systems, working across the full cycle from development to user acceptance testing
- Conducted **quality assurance testing** across AI-powered pipelines and collaborated with teams on automation improvements and prompt-flow pipeline optimization

PROJECTS

CoachingKart Backend | *Node.js · Express · Prisma ORM · PostgreSQL · JWT* | [coachingkart.in](#)

- Built and extended the backend for a **multi-institution coaching management platform**, implementing RESTful APIs across 10+ modules including students, batches, courses, subjects, lectures, faculties, banners, and results
- Designed a **student self-registration and admin approval workflow** with conditional hard-delete on rejection, and **JWT-based single-session enforcement** with enrollment expiry auto-detected on every request via middleware
- Implemented a **role-based access control system** spanning platform and institution contexts, with two-step delete guards and ownership-scoped queries across all modules; performed end-to-end API testing using **Postman**

ShaheenDev Portfolio | *TypeScript · Vite · Express · Vercel* | [shaheendevlopers.in](#)

- Contributed to the production portfolio site for Shaheen Developers — built and integrated the **Career page API** with résumé upload using **multer** and Gmail attachment delivery, and completed the **Contact form API**
- Added **Vercel Speed Insights and Analytics**, fixed UI/UX issues, and maintained 45+ production deployments across the main and preview channels

Holiday Heed — Kashmir Tour Packages Website | [holidayheedkashmir.in](#)

- Built a full-stack travel agency website using **Next.js** and **TypeScript** with dynamic tour package listings, seasonal travel guide, and a customer inquiry/quote form for lead generation
- Deployed on **Vercel** with 13+ production deployments; implemented responsive UI and integrated **SpeedInsights** for performance monitoring

VideoQueryAI: Interactive Video Questioning | *Qwen2-VL-7B-Instruct · Python*

- Built an interactive video understanding system enabling **natural-language queries over video frames** using a self-hosted Qwen2-VL-7B-Instruct model with frame extraction, temporal reasoning, and Q&A for educational use cases

EDUCATION

Central University of Kashmir

Aug. 2021 – May 2025

Bachelor of Technology in Computer Science and Engineering

J&K, India

CERTIFICATIONS

Machine Learning Specialization — DeepLearning.AI & Stanford (2024) [Link]

Machine Learning Pipelines with Azure ML Studio — Microsoft Azure (2023) [Link]

Machine Learning A-Z — Udemy (2023) [Link]

SKILLS

Languages : Python, TypeScript, JavaScript

Backend : Node.js, Express.js, Prisma ORM, PostgreSQL, JWT, REST APIs, Postman

AI/ML : Machine Learning, Deep Learning, RAG, LLMs, NLP, Computer Vision, Prompt Engineering, TensorFlow, PyTorch, Scikit-learn, LangChain

Frontend : Next.js, React, Streamlit

Cloud & Tools : Azure AI Services, Azure OpenAI, Azure Cognitive Search, Vercel, Git, Docker, Vector Embeddings, Semantic Search
